Family Services Coronavirus Update

Like the rest of the community, the nation and the world, we are watching the news about the Coronavirus and taking appropriate measures based on the information available. Our goal is to keep Family Services operating at the highest capacity possible, while still attending to the health of our staff, clients, and volunteers. As of today, (Thursday, 3/12) the organization remains open and operating normally with the following modifications:

- Group programs and meetings with over 25 people are being canceled.
- Group programs that engage individuals who might have compromised health conditions are being canceled.
- Daily cleaning of our spaces has been significantly increased to disinfect all surfaces and common areas.
- Policies relating to employees who might be showing any symptoms or have any possibility of exposure are being implemented.

We’ll continue to make changes as needed and utilize social media and our web site to post updates. Updates will not necessarily be published daily, but rather as things change. If the update is dated days ago, assume nothing has changed since.

Be well.
